Definition of Social Justice

The Diverse City (DC) Fund defines social justice as the process through which society attains a more equitable distribution of power and resources in the political, economic and social realms. To achieve this vision, people of color must be able to redefine their relationship to power, institutions, and each other. We believe in a systemic change approach that examines the intersecting causes of conditions, and seeks to identify and remove structural barriers to long-term opportunity and well-being.

The DC Fund invests in social justice projects which:

- Amplify the leadership and voice of those directly affected by issues and needs,
- Take action to create equitable outcomes and transfer of power and resources to directly-affected communities, and
- Tackle root problems by engaging directly-affected communities to find solutions, organize against oppression of all kinds, and create mechanisms for change.

Please see our Grantmaking Guidelines for more details: www.diversecityfund.org/grants/diverse-city-fund-grantmaking-guidelines/
